1. INTRODUCTION

1.1 Project Overview:

This project involves the development of a CRM-based Jewel Management System using Salesforce. It streamlines operations like inventory tracking, price updates, billing, and customer management for a jewellery business. The project leverages Salesforce Lightning Platform to design custom objects, automate processes using Flows, and generate actionable insights via dashboards and reports.

1.2 Purpose:

The purpose is to replace manual processes with an automated, cloud-based Salesforce CRM that enables real-time stock updates, dynamic pricing, customer billing, and order tracking. The system enhances customer experience, operational accuracy, and business decision-making.

The purpose of this project is to design and implement a Salesforce-based CRM solution specifically for jewel businesses to:

- Centralize customer information and communication.
- Track and manage jewellery inventory (gold and silver).
- Enable personalized marketing and offers.
- Facilitate efficient order processing and billing.
- Improve customer retention through engagement automation.
- Generate detailed reports on sales, trends, and staff performance.

2. IDEATION PHASE

2.1 Problem Statement:

Traditional jewellery shops face problems like manual stock maintenance, lack of customer records, and inefficiencies in pricing and billing. There's also no integrated view of customer interactions. This leads to errors, delayed decision-making, and customer dissatisfaction. Many small to mid-sized jewellery retailers struggle with managing customer relationships, tracking sales, handling special orders, and maintaining inventory. Current

manual systems or generic software often fall short of addressing the industry's unique needs.

2.2 Empathy Map Canvas:

Think & Feel

- Are we missing out on leads because we're not following up?
- I need to know who our high-value customers are.

Hear

- The customer wasn't happy with the delay in their custom order.
- Can we send reminders for anniversaries and birthdays?

See

- Registers with scribbled orders.
- Multiple Excel sheets for billing and inventory.

Say & Do

- Call them about the pendant order tomorrow.
- Print out last year's top customers list.

Pain

- Losing customers due to lack of follow-up.
- No real-time inventory tracking.

Gain

- Higher customer satisfaction.
- More repeat purchases via automation.

2.3 Brainstorming:

The brainstorming phase focused on collecting diverse ideas from stakeholders—including jewel store owners, sales representatives, developers, and end-users—to define potential solutions and functionalities required in the CRM application. This collaborative ideation process aimed to understand the operational bottlenecks in the jewelry business and how Salesforce’s cloud ecosystem could streamline them.

Ideas collected during brainstorming:

- Use of custom objects for Items, Billing, Orders, and Customers.
- Automate stock management with flows.
- Dashboard for daily performance insights.
- Notifications for low inventory.
- Implement record-triggered and scheduled flows.
- Introduce validation rules to prevent data inconsistencies.
- Plan separate dashboards for different roles (sales, inventory, admin).

3. Requirement Analysis

3.1 Customer Journey Map:

The customer journey map outlines the stages a customer experiences, from the first interaction to post-purchase engagement. It helps identify gaps and opportunities where the CRM can automate and enhance customer experience.

Awareness Stage

- Customer browses website or social media.
- CRM captures leads using Web-to-Lead forms.

Consideration Stage

- Customer visits the store or requests a catalog.

- Salesforce auto-assigns a sales representative.
- Email/SMS with product recommendations is triggered.

Purchase Stage

- Customer places an order (in-store or online).
- CRM logs the order and creates a sales opportunity.
- Invoice is generated using built-in templates.

Delivery Stage

- Customer receives order.
- CRM sends order tracking notifications and confirmations.

Post-Purchase Stage

- Customer receives feedback form.
- Loyalty points are updated.
- Follow-up reminders for anniversaries, birthdays, etc.

3.2 Solution Requirements:

Defines the function (what the system should do) and non-functional (how the system performs) needs to fulfill business goals.

- Real-time item stock tracking
- Dynamic pricing management
- Billing with automated tax calculations
- Comprehensive dashboards and reports
- Data security and accessibility
- Integration with communication tools (email/SMS)

- Record ownership for audit and traceability.

3.3 Data Flow Diagrams:

DFD illustrates how data moves between the system's components, helping developers visualize dependencies and database interaction points.

Main Entities & Data Flow Points:

- Customer submits a product inquiry.
- Data flows to CRM Interface (Form or App).
- CRM creates or updates the Customer Object.
- CRM logs sales and updates the Sales Record.
- Inventory count is adjusted in the Inventory Object.
- Reports are updated to reflect real-time sales and stock.

3.4 Technology Stack:

Defines the tools and platforms used to develop, deploy, and manage the CRM system in Salesforce.

- **Platform:** Salesforce Lightning Experience.
- **Logic:** Apex Triggers, Validation Rules, Flow Builder.
- **UI:** Lightning Tabs, Pages, Reports, Dashboards.
- **Database:** Salesforce Standard & Custom Objects.
- **Integration:** Email Templates, Scheduled Flows, Approval Processes.

4. PROJECT DESIGN

4.1 Problem Solution Fit:

- **Problem:** Manual processes and lack of centralized tracking
- **Solution:** Salesforce CRM system automating every major jewelry workflow

4.2 Proposed Solution:

Five major custom objects: Item__c, Price__c, Jewel_Customer__c, Customer_Order__c, Billing__c

- Lightning app with navigation tabs
- Automated flows for inventory, billing, and notifications
- Dashboards visualizing sales, stock, and revenue performance

4.3 Solution Architecture:

Objects and Relationships:

- Jewel_Customer__c <-> Customer_Order__c <-> Billing__c <-> Item__c <-> Price__c
- Lookup and Master-Detail fields used to link records
- Formula fields for auto-calculations (e.g., total billing amount)
- Validation rules for quantity and price limits
- Record Types to distinguish Gold, Silver, and Diamond workflows

5. PROJECT PLANNING AND SCHEDULING

5.1 Project Planning:

The planning and scheduling phase involves defining the project's timeline, scope, team responsibilities, tools, and milestones. It ensures the project stays on track and aligns with business goals while delivering the CRM application in an efficient, scalable, and phased manner.

- Week 1: Requirement gathering, Use Case and ER Diagrams
- Week 2: Custom object creation, Page Layouts, and Tab Setup
- Week 3: Flows and Automation Setup, Validation Rules
- Week 4: Reports and Dashboards, Testing and Review
- Week 5: Final Deployment, Documentation, and User Training

6. PROJECT DEVELOPMENT PHASE - SALESFORCE GUIDED PROJECT

The development phase is the backbone of the CRM application, where core functionalities were implemented using Salesforce's declarative tools and programmatic capabilities. This phase was conducted in iterative sprints, following Agile methodology, and broken into several key activities.

6.1 Developer Environment Setup:

- Create Salesforce Developer Org via developer.salesforce.com/signup

Fill in the required information, verify email, set a password, and access Salesforce Setup.

The screenshot shows the Salesforce Developer Edition sign-up page in a web browser. The page has a dark blue header with the Salesforce logo and the text "Build enterprise-quality apps fast and get hands-on with Agentforce and Data Cloud." Below this, it says "Sign up for your Developer Edition." and lists several benefits: "Build apps fast with drag-and-drop tools", "Go further with Apex code", "Build AI agents with Agentforce", "Harmonize your data with Data Cloud", "Ground Agentforce with structured and unstructured data", and "Integrate with anything using APIs".

The main form area is titled "Sign up for your Developer Edition" and includes the following fields:

- First name: Shri
- Last name: Harini
- Job title: developer
- Work email: shrihariniselvakumar@gmail.com
- Company: Nadar Saraswathi Co.
- Country/Region: India

Below the form, there is a checkbox for "I agree to the Main Services Agreement - Developer Services and Salesforce Program Agreement." and a "Sign Me Up" button. The page also features a "Steps" section with "Select Type" and "Agentforce" options, including "Customer Support", "Sales Coach", and "Sales Development".

Change Your Password

Enter a new password for **objectpavilove123@gmail.com**. Make sure to Include at least:

- ✓ 12 characters
- ✓ 1 letter
- ✓ 1 number
- ✓ 1 special character ⓘ

* New Password

6.2 Custom Object Creation:

We create five main custom objects for Jewel Customer, Item, Customer Order, Price, and Billing.

1. Jewel Customer

The screenshot shows the Salesforce Setup interface for the 'Jewel Customer' custom object. The top navigation bar includes the Salesforce logo, a search bar, and various utility icons. The main navigation menu on the left lists options like Setup, Home, and Object Manager. The 'Object Manager' tab is selected, and the 'Jewel Customer' object is chosen. The left sidebar shows a list of configuration options, with 'Details' selected. The main content area displays the 'Details' for the 'Jewel Customer' object, including fields like Description, API Name (Jewel_Customer__c), Custom (checked), Singular Label (Jewel Customer), Plural Label (Jewel Customers), Enable Reports (checked), Track Activities (checked), Track Field History, Deployment Status (Deployed), and Help Settings (Standard salesforce.com Help Window). Edit and Delete buttons are visible in the top right corner.

Field	Value
Description	
API Name	Jewel_Customer__c
Custom	✓
Singular Label	Jewel Customer
Plural Label	Jewel Customers
Enable Reports	✓
Track Activities	✓
Track Field History	
Deployment Status	Deployed
Help Settings	Standard salesforce.com Help Window

2. Item

The screenshot shows the Salesforce Setup interface for the 'Item' custom object. The top navigation bar includes the Salesforce logo, a search bar, and various utility icons. The main navigation menu on the left lists options like Setup, Home, and Object Manager. The 'Object Manager' tab is selected, and the 'Item' object is chosen. The left sidebar shows a list of configuration options, with 'Details' selected. The main content area displays the 'Details' for the 'Item' object, including fields like Description, API Name (Item__c), Custom (checked), Singular Label (Item), Plural Label (Items), Enable Reports (checked), Track Activities (checked), Track Field History, Deployment Status (Deployed), and Help Settings (Standard salesforce.com Help Window). Edit and Delete buttons are visible in the top right corner.

Field	Value
Description	
API Name	Item__c
Custom	✓
Singular Label	Item
Plural Label	Items
Enable Reports	✓

6.5 Creation of Fields

1. Creating a lookup relationship

To create a relationship between the Jewel Customer & Customer Order Objects.

The screenshot shows the Salesforce Setup interface. The top navigation bar includes 'Setup', 'Home', and 'Object Manager'. The main content area is titled 'Customer Order' and shows the 'Fields & Relationships' section. A table lists 6 items, sorted by Field Label. The table has columns: FIELD LABEL, FIELD NAME, DATA TYPE, CONTROLLING FIELD, and INDEXED. The items are: Created By (CreatedBy, Lookup(User)), Customer (Customer__c, Lookup(Jewel Customer)), Customer Order Id (Name, Auto Number), Item (Item__c, Master-Detail(Item)), Last Modified By (LastModifiedById, Lookup(User)), and Order Status (Order_Status__c, Picklist).

FIELD LABEL	FIELD NAME	DATA TYPE	CONTROLLING FIELD	INDEXED
Created By	CreatedBy	Lookup(User)		
Customer	Customer__c	Lookup(Jewel Customer)		✓
Customer Order Id	Name	Auto Number		✓
Item	Item__c	Master-Detail(Item)		✓
Last Modified By	LastModifiedById	Lookup(User)		
Order Status	Order_Status__c	Picklist		

2. Creating a Master-Detail Relationship

Creating a Master-Detail Relationship between Item & Customer Order Object.

The screenshot shows the Salesforce Setup interface. The top navigation bar includes 'Setup', 'Home', and 'Object Manager'. The main content area is titled 'Customer Order' and shows the 'Fields & Relationships' section. A table lists 6 items, sorted by Field Label. The table has columns: FIELD LABEL, FIELD NAME, DATA TYPE, CONTROLLING FIELD, and INDEXED. The items are: Created By (CreatedBy, Lookup(User)), Customer (Customer__c, Lookup(Jewel Customer)), Customer Order Id (Name, Auto Number), Item (Item__c, Master-Detail(Item)), Last Modified By (LastModifiedById, Lookup(User)), and Order Status (Order_Status__c, Picklist).

FIELD LABEL	FIELD NAME	DATA TYPE	CONTROLLING FIELD	INDEXED
Created By	CreatedBy	Lookup(User)		
Customer	Customer__c	Lookup(Jewel Customer)		✓
Customer Order Id	Name	Auto Number		✓
Item	Item__c	Master-Detail(Item)		✓
Last Modified By	LastModifiedById	Lookup(User)		
Order Status	Order_Status__c	Picklist		

3. Creating a Text Field in the Jewel Customer Object

The screenshot shows the Salesforce Setup interface for the 'Jewel Customer' object. The 'Fields & Relationships' section is active, displaying a list of 11 fields. The fields are sorted by Field Label. The table below shows the fields and their properties:

FIELD LABEL	FIELD NAME	DATA TYPE	CONTROLLING FIELD	INDEXED
City	City__c	Text(20)		
Country	Country__c	Text(18)		
Created By	CreatedById	Lookup(User)		
Customer name	Name	Text(80)		✓
Email	Email__c	Email		
Last Modified By	LastModifiedById	Lookup(User)		
Owner	OwnerId	Lookup(User,Group)		✓

4. Creating the Phone field in the object Jewel Customer

The screenshot shows the Salesforce Setup interface for the 'Jewel Customer' object. The 'Fields & Relationships' section is active, displaying a list of 11 fields. The fields are sorted by Field Label. The table below shows the fields and their properties:

FIELD LABEL	FIELD NAME	DATA TYPE	CONTROLLING FIELD	INDEXED
Country	Country__c	Text(18)		
Created By	CreatedById	Lookup(User)		
Customer name	Name	Text(80)		✓
Email	Email__c	Email		
Last Modified By	LastModifiedById	Lookup(User)		
Owner	OwnerId	Lookup(User,Group)		✓
Phone	Phone__c	Phone		
State	State__c	Text(20)		

5. Creating the Email field in the object Jewel Customer

4. Customer Order: Order Status

The screenshot shows the Salesforce Setup interface for the 'Customer Order' object. The left sidebar contains navigation links: Details, Fields & Relationships (selected), Page Layouts, Lightning Record Pages, Buttons, Links, and Actions, Compact Layouts, Field Sets, Object Limits, Record Types, Related Lookup Filters, and Search Layouts. The main content area is titled 'Customer Order' and 'Fields & Relationships'. It displays a table of 6 fields, sorted by Field Label. The table has columns: FIELD LABEL, FIELD NAME, DATA TYPE, CONTROLLING FIELD, and INDEXED. The fields listed are: Created By (Lookup(User)), Customer (Lookup(Jewel Customer)), Customer Order Id (Auto Number), Item (Master-Detail(Item)), Last Modified By (Lookup(User)), and Order Status (Picklist).

FIELD LABEL	FIELD NAME	DATA TYPE	CONTROLLING FIELD	INDEXED

Customer	Customer__c	Lookup(Jewel Customer)		✓
Customer Order Id	Name	Auto Number		✓
Item	Item__c	Master-Detail(Item)		✓
Last Modified By	LastModifiedById	Lookup(User)		
Order Status	Order_Status__c	Picklist		

5. Billing: Field Label-Item, Ornament, Stone Weight, Weight, Amount, Gold/Silver Price, KDM Charge, Making Charges, Stone/Other Price, Total Amount.

The screenshot shows the Salesforce Setup interface for the 'Billing' object. The left sidebar contains navigation links: Details, Fields & Relationships (selected), Page Layouts, Lightning Record Pages, Buttons, Links, and Actions, Compact Layouts, Field Sets, Object Limits, Record Types, Related Lookup Filters, and Search Layouts. The main content area is titled 'Billing' and 'Fields & Relationships'. It displays a table of 16 fields, sorted by Field Label. The table has columns: FIELD LABEL, FIELD NAME, DATA TYPE, CONTROLLING FIELD, and INDEXED. The fields listed are: Amount (Formula (Currency)), Billing Id (Auto Number), Created By (Lookup(User)), Gold/Silver Price (Formula (Currency)), Item (Lookup(Item)), KDM Charge (Formula (Currency)), and Last Modified By (Lookup(User)).

FIELD LABEL	FIELD NAME	DATA TYPE	CONTROLLING FIELD	INDEXED

11. Creation of Schema Builder

12. Creation of Field Dependencies

The screenshot shows the 'Item' object configuration page in the Object Manager. The left sidebar contains a list of configuration options: 'Details', 'Fields & Relationships' (selected), 'Page Layouts', 'Lightning Record Pages', 'Buttons, Links, and Actions', 'Compact Layouts', 'Field Sets', 'Object Limits', 'Record Types', 'Related Lookup Filters', and 'Search Layouts'. The main content area is titled 'Item' and includes a 'Required' checkbox and a 'Default Value' field. The 'Fields & Relationships' section is expanded, showing 'Picklist Options' with a 'Restrict picklist to the values defined in the value set' checkbox checked and a 'Controlling Field' dropdown set to '(New)'. Below this is the 'Picklist Values Used' section, showing 'Active and inactive picklist values' as '4 (1,000 max)'. The 'Field Dependencies' section is highlighted, showing a table with columns 'Action', 'Dependent Field', 'Data Type', and 'Modified By'. The table contains one entry: 'Expected Days Of Return' (Picklist) modified by 'Kaamru@hina.GR' on '10/31/2025, 9:00 PM'. Below the table is the 'Validation Rules' section, which states 'No validation rules defined.' and includes a 'New' button. At the bottom, there is a 'Values' section with buttons for 'New', 'Reorder', 'Replace', 'Printable View', and 'Chart Colors', and a 'Values Help' link.

6.9 Creation of Page Layouts

We create the page layouts for gold and silver Items

The screenshot shows the Salesforce Setup interface. The left sidebar contains a navigation menu with options: Details, Fields & Relationships, Page Layouts (selected), Lightning Record Pages, Buttons, Links, and Actions, Compact Layouts, Field Sets, Object Limits, Record Types, Related Lookup Filters, and Search Layouts. The main content area is titled 'Item' and displays a list of Page Layouts. The list has columns for Page Layout Name, Created By, and Modified By. There are four items listed: Item Layout, Page Layout for Gold, Page Layout for Silver, and Silver. Each item has a dropdown arrow on the right. The top of the page shows the 'Setup' tab, a search bar, and various utility icons.

PAGE LAYOUT NAME	CREATED BY	MODIFIED BY
Item Layout	Kaamruthina GR, 10/28/2025, 10:01 PM	Kaamruthina GR, 11/1/2025, 12:37 AM
Page Layout for Gold	Kaamruthina GR, 10/29/2025, 5:59 AM	Kaamruthina GR, 11/1/2025, 12:37 AM
Page Layout for Silver	Kaamruthina GR, 10/29/2025, 6:08 AM	Kaamruthina GR, 11/1/2025, 12:37 AM
Silver	Kaamruthina GR, 10/29/2025, 6:37 AM	Kaamruthina GR, 11/1/2025, 12:37 AM

6.10 Creation of Record Types

We create the gold and silver records

This screenshot is identical to the one above, showing the Salesforce Setup interface for 'Item' Page Layouts. It displays the same navigation menu and table of four page layouts: Item Layout, Page Layout for Gold, Page Layout for Silver, and Silver. The interface includes the standard Salesforce header with the Setup tab, search bar, and utility icons.

PAGE LAYOUT NAME	CREATED BY	MODIFIED BY
Item Layout	Kaamruthina GR, 10/28/2025, 10:01 PM	Kaamruthina GR, 11/1/2025, 12:37 AM
Page Layout for Gold	Kaamruthina GR, 10/29/2025, 5:59 AM	Kaamruthina GR, 11/1/2025, 12:37 AM
Page Layout for Silver	Kaamruthina GR, 10/29/2025, 6:08 AM	Kaamruthina GR, 11/1/2025, 12:37 AM
Silver	Kaamruthina GR, 10/29/2025, 6:37 AM	Kaamruthina GR, 11/1/2025, 12:37 AM

6.11 Creation of Permission Sets

The screenshot shows the Salesforce Setup interface. The left sidebar contains navigation links: Setup Home, Salesforce Go, Service Setup Assistant, Commerce Setup Assistant, Hyperforce Assistant, Release Updates, Salesforce Mobile App, Lightning Usage, Optimizer, Sales Cloud Everywhere, ADMINISTRATION, Users, Permission Set Groups, **Permission Sets**, and Profiles. The main content area is titled 'Permission Sets' and shows details for the 'Per to Worker' permission set. It includes a search bar, buttons for 'Find Settings...', 'Clone', 'Edit Properties', 'Manage Assignments', and 'View Summary'. Below this is a 'Permission Set Overview' table with columns for Description, License, API Name, and Per_to_Worker. The table shows that the permission set is not activated, has no groups added, and was created and last modified by 'Kaamruthina GR' on 10/29/2025. Below the table are sections for 'Apps', 'Assigned Apps', 'Assigned Connected Apps', 'Object Settings', and 'App Permissions'.

Description	License	API Name	Per_to_Worker
Session Activation Required	☐	Namespace Prefix	Created By
Permission Set Groups Added To	0		Last Modified By

6.12 Create a Trigger

The screenshot shows the Salesforce IDE with the 'UpdatePaidAmountTriggerHandler.apxc' file open. The code is as follows:

```
1 public class UpdatePaidAmountTriggerHandler {
2
3     public static void handleBeforeInsert(List<Billing__c> newBillings) {
4
5         for (Billing__c billing : newBillings) {
6
7             billing.Paid_Amount__c = billing.Paying_Amount__c;
8
9         }
10    }
11 }
12
13
14
```

Below the code editor is a 'Logs' tab with a table showing log entries. The table has columns for User, Application, Operation, Time, Status, Read, and Size. The table is currently empty.

```

File Edit Debug Test Workspace Help < >
UpdatePaidAmountTriggerHandler.apxc UpdatePaidAmountTrigger.apxt
Code Coverage: None API Version: 65 Go To

1 trigger UpdatePaidAmountTrigger on Billing__c (before insert, before update) {
2
3   if (Trigger.isInsert) {
4
5       UpdatePaidAmountTriggerHandler.handleBeforeInsert(Trigger.new);
6
7   } else if (Trigger.isUpdate) {
8
9       UpdatePaidAmountTriggerHandler.handleBeforeUpdate(Trigger.oldMap, Trigger.new);
10
11   }
12
13 }

7. Flows

8. Conclusion :

In conclusion, the CRM Application for Jewel Management serves as a robust, cloud-based solution built using Salesforce. It brings digital transformation to traditional jewelry retailing by:

- Streamlining operations with custom objects and flows
- Improving business oversight with real-time dashboards
- Automating repetitive tasks like billing and inventory updates
- Enhancing data integrity and customer service

The project demonstrates how low-code tools like Salesforce Flow and Lightning App Builder can be used by developers to create enterprise-grade solutions. Our application is not only scalable and efficient but also provides a solid foundation for future business growth in the jewelry sector.
